Asset Tracking Software

Fixed Asset Tracking Made Easy

Track computers, equipment, furniture, vehicles, and other valuable assets using this comprehensive cloud-based asset tracking solution.

RedBeam integrates best asset-tracking practices: barcoding, detailed record-keeping, and reporting capability into one powerful system. Ideal for businesses and organizations that need to track 500 or more fixed assets, the solution provides a complete fixed asset database, the ability to easily keep asset records up to date, and streamline the physical inventory process by up to 70%.

Easily capture important information about each asset, including barcode ID, location, department, status, purchasing, and user-definable fields. Use your Android or iOS smartphone or tablet to add and manage your fixed assets on the fly.

RedBeam can help you:

- Gain full visibility of high-value assets.
- Maintain regulatory and compliance standards.
- Improve your bottom line.

Features:

- Web-based solution
- Mobile friendly
- Unlimited assets and locations
- Detailed reporting

Benefits:

- Speed up the tracking process
- Improve visibility and prevent loss
- Meet audit requirements
- Improve reporting
